

PUBLIC TRANSPARENCY REPORT

2025

Landkreditt Forvaltning AS

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Landkreditt Forvaltning funds are managed with a focus on delivering the best possible returns relative to risk over time. This is done within the boundaries set by each fund's statutes and prospectuses. Since the area of sustainability represents both risks and opportunities, ESG risk (ESG, Environmental, Social and Governance) must be included in assessments of both the companies' risk and the companies' potential. We incorporate various approaches to responsible investments:

1. ESG Risk Assessment We take sustainability risks seriously and include them in our company analyses, both before making an investment and afterward.

Our ESG analyst use both internal and external data to assess the companies on a yearly basis, guided by our materiality framework.

2. ESG Risk Integration First, we complete the ESG risk assessment so that the most significant ESG risks are highlighted and integrated before the investment decision is made. If a company does not meet the minimum requirements in the checklist, they are placed on the observation list, but this does not exclude investment but triggers our guideline for engagement and exercise of voting right.

3. Principal Adverse Impacts (PAI)

Assessment of the most important adverse impacts on sustainability factors is measured and followed up to follow up on our measures and targets set out in the PAI statement.

We actively use Datia's analysis tool to assess, among other things, Principal Adverse Impact (PAI) data. The funds' PAI statement can be found on the company's sustainability website and is updated annually.

4. Exclusions Some companies are excluded based on risk assessments and some based on ethical exclusion criteria.

The Landkreditt funds exclude companies from the investment universe if they: produce weapons that, in normal use, violate fundamental humanitarian principles (Controversial Weapons), turnover related to gambling (> 5% of revenues), engage in tobacco production (5% of revenues), produce pornographic material (5% of revenues), extract thermal coal (5% of revenues) or extract oil from oil sands (5% of revenues) In addition to the product-based exclusion criteria above, we also exclude companies that take unacceptable risks based on factors related to, among other things, serious environmental damage, violations of human rights, including child labor and labor rights, gross corruption and other gross violations of fundamental ethical norms from the investment universe. The companies we are invested in are screened against the criteria for exclusion and observation in this guideline.

Landkreditt Forvaltning follows the advice of the Council on Ethics for the Government Pension Fund Global. Companies we are invested in that violate this guideline will be investigated further and we will enter into a dialogue with the company, either alone or together with other investors. If this does not lead to progress, the next step will be exclusion and a risk-based sell-down. Ongoing follow-up of the companies we are invested in to ensure that they do not violate our exclusion criteria. This is based on data obtained from the analysis companies Datia, Refinitiv (LSEG) and our own analyses (annual reports, etc.). If a company is in breach of this guideline, we will place the company on an observation list and implement measures that best safeguard the interests of the unitholders.

Such measures may include several factors, such as dialogue with the companies, cooperation with other investors and a new assessment of the ownership. Landkreditt Aksje Global, which is a fund of funds, is not subject to our exclusion criteria.

5. Active Ownership In addition to excluding companies directly from our investment universe, we want to have proactive dialogues with the companies through the exercise of active ownership so that we can better understand the risks and provide feedback. This is done through direct dialogue with the companies, voting at selected general meetings and/or in bondholder meetings, as well as through cooperation with industry associations and investor groups with overlapping interests.

We expect the companies we invest in to act in line with the ten principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, and their underlying conventions. In the ownership dialogue, we take as our starting point the principles of the Norwegian Committee on Corporate Governance (NUES).

A list of our votes can be found on our website. The guideline for exercising voting rights is available on our website.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

In 2024, we continued to strengthen our commitment to sustainability and responsible investment practices. We voted at Annual General Meetings (AGMs), reported in accordance with the SFDR Level 2 framework, and published our first Principal Adverse Impact (PAI) statement. These steps reflect our ongoing efforts to increase transparency and accountability across our investment processes. Building on the ESG structures established in previous years, our ESG checklist and ESG watchlist continued to serve as central tools for identifying and monitoring sustainability risks. Throughout the year, an ESG Risk Assessment and ESG Risk Integration is completed for the companies within our funds. Prior to including new companies in our portfolios, our ESG analyst completed the ESG checklist. If a company did not meet the minimum requirements, it was placed on the watchlist, and managers-initiated engagement with the company to address ESG-related concerns. This systematic approach supports more informed and responsible investment decisions. Throughout the year, we also continued our work related to the Norwegian Transparency Act. As part of the Landkreditt Group, we remained compliant with the act's requirements and updated our disclosures accordingly. Our latest assessment again indicated a low risk of human rights violations or unacceptable working conditions among our direct suppliers and business partners. Landkreditt Forvaltning remains an active member of Norsif, the Norwegian Forum for Responsible and Sustainable Investments, the VFF ESG Committee, and the UN Global Compact. Through these affiliations and our proactive efforts, we aim to continuously align our investment practices with globally recognized sustainability standards and contribute to a more responsible financial industry.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Over the next two years, we have several key reporting obligations and sustainability initiatives on our agenda. We remain committed to fulfilling the requirements under SFDR Level 2 and will continue to seek the most effective ways to integrate responsible investments into our daily operations.

In parallel, we will uphold all regulatory reporting obligations and strengthen our focus on ESG risk assessment and supplier analysis. Through these efforts, we aim to deepen our commitment to responsible practices. These initiatives will facilitate our growth while ensuring that responsible investments remains at the core of our operations.

Which senior level body(ies) or role(s) in your organisation have formal oversight over and accountability for responsible investment?

- (A) **Board members, trustees, or equivalent**
- (B) **Senior executive-level staff, or equivalent**

Specify:

As a small company with a staff of 10 employees, our organization places a strong emphasis on responsible investments, fostering oversight and accountability. Our senior leader plays an important role, in overseeing investment decisions, approving policies, and providing valuable support to our team members with any queries related to ESG considerations.

- (C) **Investment committee, or equivalent**

Specify:

Within our company, the investment committee holds the responsibility of determining which companies to invest in. The portfolio manager shares information about a potential company that they want to invest in with the ESG analyst. The ESG analyst conducts a thorough screening of the company to ensure it aligns with our ESG standards and criterias. If a company fails to meet the minimum requirements in the checklist, the company is automatically placed on a watchlist.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Screening underlying securities both through a service provider and internally by our ESG analyst. The pre-screening process is reviewed by our compliance officer.

(2) Describe how this process is integrated into your overall risk management

We conduct screenings before including new securities in our funds. Additionally, we conduct annual screenings of the companies we invest in. During these evaluations, we carefully evaluate the ESG-risks associated with the company.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

In 2023, we established an ESG watchlist. Upon discovering violations (ESG) within companies we invest in; the fund manager will contact the company's sustainability officer with relevant information. If we find that a company is in breach of our "Guidelines for responsible investments," we will place the company on a watchlist and take actions that best safeguard the interests of shareholders. Such actions may involve various measures, including dialogue with the companies, collaboration with other investors, and an assessment of ownership. The ESG watchlist serves as an effective mechanism for holding companies accountable for their actions.

(2) Describe how this process is integrated into your overall risk management

Our compliance officer monitors this list on a monthly basis, overseeing our company's risk management. Additionally, the ESG watchlist is regularly reviewed by our ESG analyst and portfolio managers. The portfolio manager reports any breaches, while the ESG analyst updates the watchlist accordingly. Following the placement of a company on the watchlist, potential next steps may involve dialogue with the companies, collaboration with other investors, and an assessment of ownership.
